

16 April 2019 Tokyo, Japan

Grand Ballroom, Mandarin Oriental, Tokyo

(3rd floor, Nihonbashi Mitsui Tower, 2-1-1 Nihonbashi-muromachi, Chuo-ku, Tokyo, Japan)

The Securities Analysts Association of Japan

The following issues are recognized as challenges in the current asset management industry.

- 1) Response to environmental changes in asset management (governance reforms, ESG perspectives, MiFID II, FD rules, etc.)
- 2) Conversion from conventional investment style due to operational difficulties under the severe condition
- 3) Development of products that contribute to the stable asset formation for the public in terms of risk/return profiles
- 4) Effective customer-oriented initiatives and business operations
- 5) Information provision services and the creation of added value in line with the evolution of digital technology

In light of these challenges, the asset management industry will continue to develop investment strategies and business strategies that are responsive to changes in the business environment.

In the seminar, we will invite top leaders in the asset management industry in Japan and the US to give lectures on the theme of "New Business in Asset Management under Digitalization" and discuss the direction to be taken in the future.

| Program Simultaneous interpretation in English and Japanese will be provided.
